

Corentis Shield

AI checkpoint for regulated workflows

Assurance and governance teams

Corentis Assurance & Evidence Brief

Runtime evidence for AI-assisted regulated workflows.

AI needs a checkpoint before it acts. Corentis provides it.

A clearer brief on how Corentis turns policy intent into checkpoint decisions, human review and evidence while work is happening.

Overview

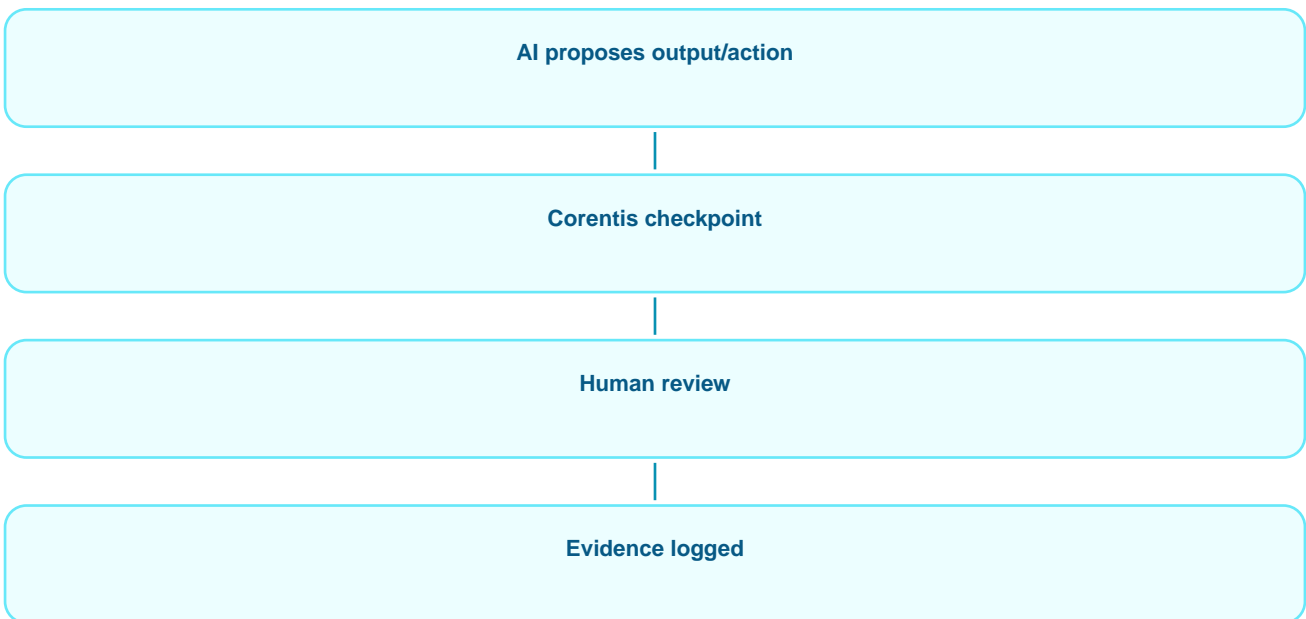

Core position

Corentis Shield is an AI checkpoint for regulated workflows.

AI needs a checkpoint before it acts. Corentis provides it. Corentis Shield is designed to help teams check AI outputs before they reach customers, teams or live systems.

VISUAL SUMMARY

Checkpoint flow

Assurance needs to move closer to action

AI assurance cannot live only in policy documents, model cards or post-event reviews. As AI moves into operational workflows, assurance needs to reach the moment when a proposed output is about to become an action.

The Corentis control loop

Corentis creates a practical loop: policy intent becomes runtime controls, AI outputs are checked at the action boundary, sensitive items route to human review, and evidence is captured for later assurance.

From policy intent to visible decisions

Policies are useful only when they shape real decisions. Corentis is designed to help teams make control decisions visible: why an output continued, paused, escalated or required review.

Evidence captured while the workflow runs

The strongest assurance evidence is created close to the workflow. Corentis is designed to capture checkpoint decisions, review routes, policy versions, blocked-action reasons and evidence completeness as work happens.

Human review where it matters

Corentis does not ask regulated teams to blindly trust AI. It helps them decide when AI output should proceed, pause, escalate or be reviewed by a human before sensitive action.

Example evidence outputs

A controlled validation project can produce a control matrix, scenario test log, review queue history, blocked-action log, policy version trail, evidence completeness score and sample pilot report.

What careful validation will show

The next stage should show which controls matter most, how consistently evidence can be captured, where false positives and false negatives appear, and what reviewers need to make confident go/no-go decisions.

Next conversation

If your organisation is exploring AI agents in regulated workflows, Corentis is ready for a focused conversation about validation, pilot design and strategic support.

SELECTED SIGNALS

Evidence context

FCA FINANCIAL LIVES

26.4m UK adults had characteristics of vulnerability in May 2024.

Financial Conduct Authority, 16 May 2025

FCA COMMUNICATIONS EXPECTATION

Firms must give consumers information they need, at the right time, presented in a way they can understand.

Financial Conduct Authority, 7 March 2025

FCA COMPLAINTS REDRESS

Total redress in FCA complaints data was £283m in 2025 H1.

Financial Conduct Authority, 23 October 2025

FCA ENFORCEMENT DATA

FCA financial penalties totalled £186.4m in 2024/25.

Financial Conduct Authority, 10 July 2025

FCA ENFORCEMENT EXAMPLE

FCA fined TSB £10.9m for failing to ensure customers in arrears were treated fairly.

Financial Conduct Authority, 10 October 2024

FCA ENFORCEMENT EXAMPLE

FCA fined Volkswagen Finance £5.4m for failing to treat customers in financial difficulty fairly.

Financial Conduct Authority, 21 October 2024
