

Corentis Shield

AI checkpoint for regulated workflows

Strategic funders and investors

Corentis Vision & Funding Readiness Overview

A public overview for strategic funding, investment and validation conversations.

AI needs a checkpoint before it acts. Corentis provides it.

A public-facing overview of the Corentis vision, the timing, the first wedge and the validation path for serious funding conversations.

Generated April 2026

For discussion and pilot exploration only

Overview

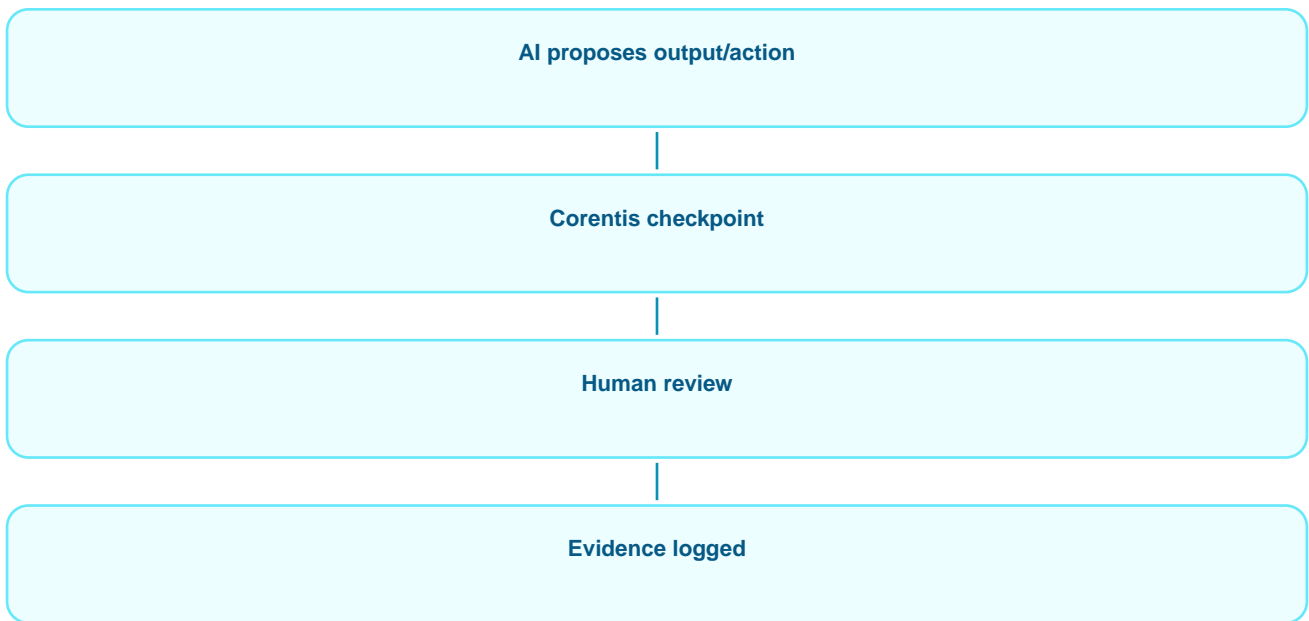

Core position

Corentis Shield is an AI checkpoint for regulated workflows.

AI needs a checkpoint before it acts. Corentis provides it. Corentis Shield is designed to help teams check AI outputs before they reach customers, teams or live systems.

VISUAL SUMMARY

Checkpoint flow

EVALUATION SHAPE

Baseline vs checkpoint

Baseline

AI proposes output or action without a runtime checkpoint. Review points and evidence gaps are assessed afterwards.

Checkpointed

AI proposes output or action. Corentis checks controls, pauses risky items, routes human review and records evidence before action.

The vision

Corentis is building runtime control infrastructure for regulated AI-agent workflows. The vision is simple: before AI acts in a sensitive workflow, there should be a checkpoint.

Why now

AI is moving from drafting to acting. That shift creates a new operational question for regulated organisations: should this AI-generated output or action move forward at all? Corentis is being built for that exact decision point.

Why government and strategic funders should care

Safer AI adoption is not only a model problem. It is an infrastructure problem. Regulated organisations need practical ways to check, pause, review, escalate and evidence AI-assisted workflows before sensitive actions affect customers or cases.

The opportunity

The opportunity is runtime control infrastructure for regulated AI agents. Corentis starts with one high-consequence wedge, then builds reusable control patterns, scenario libraries, evidence artefacts and checkpoint logic that can travel across regulated workflows.

First wedge

Financial-services complaints and vulnerable-customer workflows are the right place to start because they are emotionally sensitive, operationally pressured and evidence-heavy. They make the checkpoint need clear.

A human moment

Example context: a customer discloses job loss, missed payments and distress after repeated contact. An AI assistant drafts a standard response. Corentis Shield checks whether that output should pause, route to human review and record evidence before any customer communication proceeds.

What Corentis is building

Corentis Shield sits between AI agents and sensitive actions. It checks proposed outputs against policy, risk rules, human-review requirements and evidence requirements before anything important moves forward.

What strategic support would validate

Strategic support would help validate whether runtime checkpointing, policy-to-control mapping, scenario testing and evidence capture can improve the reviewability, control and assurance of AI-assisted regulated workflows.

The proof points to build

The next stage should build measurable proof points rather than empty claims.

- Unsafe direct-action attempts caught.
- Vulnerable-customer escalation accuracy.
- Evidence completeness score.
- Human-review routing accuracy.
- Scenario coverage.
- Policy-to-control mapping completeness.
- Blocked-action explainability.
- Audit artefact completeness.
- Clarity of go/no-go decision.

Company details

Corentis Shield is provided by Corentis Technologies Ltd. Company No. 17182737. Registered office: Suite A, 82 James Carter Road, Mildenhall, IP28 7DE, United Kingdom. Contact: hello@corentis.co.uk.

Next conversation

If your organisation is exploring AI agents in regulated workflows, Corentis is ready for a focused conversation about validation, pilot design and strategic support.

SELECTED SIGNALS

Evidence context

FCA COMPLAINTS DATA

UK financial services firms received 1.85m complaints in 2025 H1.

Financial Conduct Authority, 23 October 2025

FCA COMPLAINTS REDRESS

Total redress in FCA complaints data was £283m in 2025 H1.

Financial Conduct Authority, 23 October 2025

FCA FINANCIAL LIVES

26.4m UK adults had characteristics of vulnerability in May 2024.

Financial Conduct Authority, 16 May 2025

MCKINSEY GLOBAL AI SURVEY

88% of respondents in McKinsey's 2025 global survey reported regular AI use in at least one business function.

McKinsey & Company, 5 November 2025

MCKINSEY GLOBAL AI SURVEY

23% of respondents said their organisations are scaling an agentic AI system somewhere in the enterprise.

McKinsey & Company, 5 November 2025

IBM / PONEMON

63% of breached organisations lacked AI governance policies to manage AI or prevent shadow AI.

IBM / Ponemon Institute, 2025
